About Me

With 1 year 10 months of hands-on experience as a mobile developer, I am recognized for my exceptional multitasking abilities and dedication to delivering high-quality work. I thrive on challenges and leverage a creative mindset to consistently deliver effective solutions. Committed to continuous improvement, I actively enhance my skills to drive positive outcomes.

Key expertise

- Cordova-Capacitor
- Android Studio & SDK
- Debugging Application
- API Integration
- Google play store and App store
- Geolocation Plugins, camera plugins, PDF generator

Achievements

- Netball State Player.
- NCC under Officer Position in second year.
- The All India Essay Competition (First Position).

Hobbies

- Dance
- Art and Craft
- Poetry

Projects

Techizer Tech solution: August 2023–May 2024

Technology: iOS and Android

1 CuRx Tracker:

- Maintained an application for constructive work analysis on Play Store and iOS platforms.
- Ensured compliance with guidelines and regularly updated SDK versions and plugins.
- Maintained compatibility with updated plugins and SDK versions, ensuring seamless operation.

2 Sahyog Patient:

- Developed a patient support application with a complete UI design using HTML, CSS, and Ionic.
- Implemented features for patient education, including yoga exercise videos and downloadable diet charts in PDF format by using PDF viewer.
- I used Tailwind CSS to create a visually appealing card component with a shadow, rounded corners, and a gradient background, making it more attractive and modern

3 Spedo Plus:

- Implemented native Android features such as download functionalities using Android XML and native code integration.
- Led the development of an application targeting Campaign Visits with Ionic 4 and Angular 11.

4 Ndep:

- Developed a mobile application utilizing the Ionic Angular framework for Cordova Ionic 5.
- Implemented intuitive user interfaces using CSS and HTML, ensuring compatibility across various SDK versions. Also updated plugins.
- Created APK and enterprise link (iOS) for test and live on both platform

5 LURN :

I updated the application to SDK 33 to comply with Google's policies, redeployed it, debugged the application and resolved all plugin issues for a seamless experience.

Technogig IT solutions : July 2022–July 2023

Technology: iOS and Android

1 Aryvrat:

- Collaborated on developing a teaching and learning app with multiple master and user functionalities by using ionic framework and angular.
- Create UI, APK & IPA.

2 Stepit:

- Developed a fitness application using Ionic framework, incorporating gamification features for enhanced user engagement.
- Implemented timing and alarm functionality as per client requirements, ensuring optimal performance by angular.

3 Rullo:

- Integrated Google Maps API for data retrieval, ensuring thorough testing and UI deployment on both platforms.
- Implemented a review function allowing users to leave feedback on visited bars and restaurants, utilizing Google API for data retrieval.

4 Standard Bank:

- Played a pivotal role in developing a banking application using Ionic Angular, Tailwind CSS, and HTML.
- Integrated APIs, and provided deployment support for multiple platforms.
- Integrate Panic functionality (vibration features) by using Cordova plugins.
