

Swapnil Ghore

Software Developer

Profile

A skilled self-motivated IT professional with good knowledge seeking for a better opportunity to utilize my knowledge, skills and abilities to grow in career.

Experience

App Developer,
Dimitry Technologies Pvt. Ltd, Pune

September 2023 – Present

- Created dynamic and interactive web applications using Angular.
- Optimized application performance by implementing lazy loading and code splitting.
- Worked closely with backend developers to integrate APIs and troubleshoot issues.
- Participated in user acceptance testing and gathered feedback to improve application features.
- Enhanced user experience by integrating native device features such as uploading photos from camera.

UI Developer – Intern,
Sarvm.ai Pvt. Ltd, Bangalore

December 2022 – June 2023

- Developed and maintained multiple hybrid mobile applications using the Ionic framework and Angular.
- Collaborated with designers to create intuitive and responsive user interfaces.
- Developed cross-platform mobile applications using Ionic and Angular, focusing on responsive and adaptive design.
- Utilized Angular Router to implement complex navigation and dynamic routing within the application.
- Worked in an Agile development environment, participated in daily stand-ups, sprint planning.

Academic Project:

Library Management system with HTML CSS and JS:

- Designed, implemented, and maintained a robust database using SQL to store and manage extensive collections of books, user records, and transaction details efficiently.
- Created an intuitive and user-friendly graphical interface using HTML, CSS, and JavaScript, enabling users to search for, borrow, and return books seamlessly.

- Implemented an automated notification system to send reminders for due dates, overdue items, and reservation confirmations via email and SMS, improving user engagement and reducing overdue occurrences.
- Developed comprehensive reporting and analytics tools to track library usage patterns, generate reports on book circulation, user activity, and inventory management, facilitating data-driven decision-making.

Apple.com Clone with HTML CSS and JS:

- Developed a responsive version of Apple.com using HTML, CSS, and JavaScript, ensuring compatibility across various devices and screen sizes for an optimal user experience.
- Designed and implemented dynamic and interactive features, such as image carousels, product comparison tools, and navigation menus, enhancing user engagement and functionality.
- Ensured the website's consistent performance and appearance across different web browsers, including Chrome, Firefox, Safari, and Edge, by applying appropriate CSS resets and fallbacks.
- Employed best practices for web performance optimization, including minifying CSS and JavaScript files, lazy loading images, and utilizing browser caching to improve page load times and overall site speed.
