SUMMARY

Frontend Developer with 4 years of experience, specializing in Angular. I excel in designing scalable web applications with responsive interfaces and optimizing user experiences using RxJS and NGRX for state management. I am skilled in unit testing and have hands-on experience with micro-frontend architecture and microservices. Strong communication skills complement my familiarity with project management tools like Trello and Jira, as well as version control using Git.

SKILLS

Front-End: HTML, CSS, JavaScript, TypeScript, Angular, RxJS, Ngrx, Bootstrap.

Back-End: Java, Python.

Hybrid App: Ionic Framework, Cordova, Capacitor.

Database: MySQL.

Cloud & DevOps: AWS, Jenkins, Docker.

Version Control: Git, GitHub.

Project Management: Trello, Jira, Confluence.

EXPERIENCE

Software Developer

Centricity Fincap Pvt Ltd

June 2024 - October 2024, Mumbai

- Engaged with top management and the CEO to discuss product improvement plans, aligning development efforts with strategic business goals.
- Worked closely with business analysts to develop new features, ensuring that requirements were met and the end product delivered high value.
- Collaborated with the Scrum Master for effective sprint planning and coordinated the release and deployment of the product, ensuring timely delivery.
- Focused on optimizing both code and the overall product performance, implementing best practices to enhance efficiency and user experience.
- Actively available to address and resolve production bugs, ensuring minimal disruption and maintaining product stability

Associate Professional Application Delivery

DXC Technology

February 2022 - January 2024, Mumbai

- Designed and implemented robust API integrations, ensuring seamless communication between frontend and backend services while adhering to RESTful principles.
- Successfully integrated payment gateways into applications, ensuring secure and efficient transaction processing for users.
- Developed and executed unit tests to ensure code quality and functionality, utilizing testing frameworks like Jest and Jasmine for comprehensive test coverage.
- Conducted thorough code reviews, providing constructive feedback to colleagues to enhance code quality and maintain coding standards across the team.
- Actively assisted and mentored colleagues, sharing knowledge and best practices to foster a collaborative team environment.
- Engaged in research and development activities to explore new technologies and frameworks, driving innovation and improving existing processes.

Software Developer

Blueroad Technologies

October 2019 - July 2021, Pune

- Developed core features, handling both frontend and backend tasks to ensure smooth integration and delivery of the project.
- Actively participated in daily standups, sprint planning, and retrospectives, managing and resolving Jira tickets to meet sprint goals.
- Designed and implemented reusable components and responsive UI web pages using Angular, improving performance and user experience through RxJS and NGRX.
- Managed version control using Git, ensuring smooth code collaboration, and performed code reviews to maintain code quality.
- Improved database performance with JPA and Hibernate, minimizing downtime and optimizing query performance.

PROJECTS

One-Invictus

Centricity Fincap Private Limited • June 2024 - October 2024

- Developed a cost-effective and transparent platform to empower investment professionals in managing client portfolios, leveraging deep domain knowledge in the finance sector.
- Conducted knowledge transfer (KT) sessions for new joiners, ensuring they were equipped with the necessary skills and understanding of the platform's functionalities.
- Led a team of five members, facilitating collaboration and driving project success through effective team management and communication.
- Attended seminars and training on emerging technologies to identify and implement innovative solutions in the product.
- Implemented NGRX store for efficient state management, improving application performance and scalability while focusing on code quality analysis and application optimization to support the platform's growth plans aimed at increasing revenue and assets under management (AUM).

E-Procurement Portal

DXC Technology • February 2022 - January 2024

- Developed a centralized e-procurement platform to enhance the tendering experience for businesses and government departments in Karnataka.
- Enabled access to tenders from various government departments, streamlining the tender management process.
- Implemented lazy loading, NGRX store, models, and services to enhance application performance and maintainability.
- Conducted unit testing to ensure code quality and reliability, resulting in a more stable application.
- Followed Scrum methodology for project management, utilized Git for version control, and participated in code reviews to maintain coding standards and improve overall code quality.

Delta ESG

Blueroad Technologies • October 2019 - July 2021

- Developed a real-time dashboard focused on sustainability and energy management to optimize energy usage.
- Utilized Angular, RxJS, and NGRX for efficient application development and state management.
- Implemented Bootstrap for responsive design, ensuring compatibility across various devices.
- Focused on SEO optimization to enhance platform visibility and stakeholder engagement.
- Conducted unit testing using Karma and Jasmine to ensure code quality and functionality.

EDUCATION

Bachelor's degree in Computer Science

Savitribai Phule Pune University • Pune, Maharashtra • 2019 • First Class

- Completed coursework in Data Structures, Algorithms, Database Management Systems, and Software Engineering.
- Engaged in practical projects, including the development of a web-based application and a mobile app, showcasing hands-on programming skills.
- Participated in workshops and seminars on emerging technologies, enhancing knowledge in areas such as cloud computing and machine learning.
- Collaborated on group projects, fostering teamwork and communication skills, while applying theoretical concepts in real-world scenarios

CERTIFICATIONS

Java Full Stack and Angular

Technogeeks Consultants, Pune • 2019

- Developed a full-stack E-commerce application with Angular front-end and Spring Boot back-end.
- Developed a shopping cart with Angular frontend and Spring Boot backend integration.

INVOLVEMENT

Volunteer

Hadapsar, Pune • Pune City Connect • January 2019 - Present

- Actively contributed to urban welfare improvements by organizing camps and workshops focused on increasing healthcare access and skill development.
- Motivated community members to participate in free training programs offered by Pune City Connect to enhance their skills and employability.
